

# Drum kit

## THE DRUM KIT

This passage has no sentences marked. Work out where each sentence starts and add a capital letter at the beginning and a full stop at the end.

a typical drum kit includes a bass drum, two or three tom-toms (known as toms), a larger tom set on the floor, a snare drum, and three cymbals the bass drum lies on its side the drummer steps on a foot pedal connected to a felt covered beater, creating a thump sound the floor tom is struck with mallets or the drummer's hands it produces deep, vibrant sounds the other toms are smaller than the bass and floor tom they produce higher, mellow pitches the snare drum is fitted with a set of taut wires across its base when the player strikes the drum, these wires - the snare - vibrate against the drum's skin, producing a sharp crack cymbals create a clashing metallic sound two larger cymbals (called crash and ride) are set higher than the main drums they are hit with sticks the hi-hat is played using a foot pedal it has two cymbals that clash together when the foot pedal is pressed and released drummers can use sticks, hard or soft mallets, and wire brushes to produce different sound effects

Label the pictures on this page using each name once:
